Art Unit: 3743

The amendment filed November 23, 1999 has been entered. Claim 21 is cancelled, claims 1-20 and 22-38 are pending.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 23-30 and 36-37, drawn to a tube and shell heat exchanger, classified in class 165, subclass 158.
- II. Claims 22, 31-35 and 38, drawn to a method of manufacturing a heat exchanger, classified in class 29, subclass 890.03+.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process such as forming a unitary tube bottom and jacket with subsequent gluing of a plurality of tubes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Upon election of either invention above, this application contains claims directed to the following patentably distinct species of the claimed invention:

Art Unit: 3743

- I. The species principally illustrated in Figure 3a; and
- II. The species principally illustrated in Figure 6.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 20 and 22 appear to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 3743

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

The Examiner confirms the CPA was filed May 10, 1999 by Paul A. Schnose stating, "the filing fee in the continued prosecution application is being deferred at this time." The CPA practice has no provision for "deferred" fees. However, the Office charged the CPA filing fee in error and the application was forwarded to the Examiner for an action on the merits. The final Office action mailed May 25, 1999 is withdrawn. In the spirit of the CPA, this intentional omission delayed prosecution until an amendment was filed.

Any inquiry concerning this communication should be directed to Leonard R. Leo whose telephone number is (703) 308-2611.
